Adobe Dreamweaver level 2 course content (2-day)

Course Description:

Adobe Dreamweaver Advanced will help you to design and develop an impressive web site using Dreamweaver. This training walks through advanced concepts in Dreamweaver including creating pure CSS layouts, working with reusable assets such as Snippets, Library Items and Templates. In addition, you will get the chance to work with Adobe's Spry Framework to create AJAX-enabled web pages. This series is just what you need to take your Dreamweaver skills one step further and give your site a professional polish.

Prerequisites

Dreamweaver for Beginners course or equivalent knowledge.

Course Outline

1. Designing with CSS

- Topic A: Overview of styles sheets
- Topic B: Page layout and global styles

2. Site assets

- Topic A: Library assets, snippets, and includes
- Topic B: Templates
- Topic C: Head elements
- Topic D: Images and multimedia

3. Forms

- Topic A: Creating interactive forms

4. Rollovers, behaviours, and AP Divs

- Topic A: Applying rollovers and behaviours
- Topic B: Creating and modifying AP Divs

5. Working with XML

- Topic A: Applying XML and XSLT

6. Collaboration and accessibility

- Topic A: Collaboration
- Topic B: Accessibility, usability, and site testing
